Joker

MACHINE

Joker Classic Fork Mount Turn Signal/Marker Lights.

We upgraded our fork mount turn signal/marker lights with a super bright LED pod for more visibility. We also added a 49 mm fork tube version to our line for Dyna's and V-Rod's.

- **IMPORTANT:** If being used as a turn signal a load equalizer is required.
- Made from T6-6061 billet aluminum, then polished and chrome plated or black anodized.
- Comes with AMBER LED pod lights.
- LED pod lights are angled 25 degrees to accommodate the rake of the forks.
- Available for 39 mm, 41 mm, and our NEW 49 mm fork tubes.
- Sold in pairs.

- 653271** JOKER 39 mm lights, black (pair)
- 653272** JOKER 39 mm light, chrome (pair)

THUNDER MAX

EFI made simple.

ThunderMax ECM with Auto-Tune Closed Loop System by Zipper's

The ThunderMax makes sense in the long run as the system can grow and change as your engine does—just load a new map! ThunderMax software, firmware and maps updates are free and accessible 24/7 with an Internet connection so you're only a mouse-click away from the latest available data and product support. Dyno Tuners can access Advanced User SmartLink software that allows full custom mapping of virtually any engine combination. The ThunderMax is designed and manufactured right here in the USA and backed by a 3-year warranty! Requires exhaust system equipped for or modified for use with two oxygen sensors. 10-11 Touring models require relocation of the oxygen sensor bungs in the head pipes for 18mm Wide-Band sensors..

645542 Thundermax ECM with Auto Tune Closed Loop System for 10-12 XL models (except XR1200)

Installation and How-To videos available on-line (YouTube - ThunderMaxAV), and New AutoMap software feature creates new base map based on AutoTune automatically generated AFR corrections Adjust and Monitor

Custom 'Bobber Style Gas Tanks' by Cole Foster

An absolutely beautiful new tank designed with the keen styling of Cole Foster - Salinas Boyz Customs. The tanks feature a mini pop-up gas cap, and a unique raised tapered bead down the center of the tank. Each tank has been designed to fit to stock frames but can also be easily adapted to any custom application. They use the existing stock rubber mounts or are included as needed. Fuel capacity is 2.35 gallons.

600155 Fits Evolution Softtail models from 84-99 and 4-speed FX and FL models
Note: These applications require the front frame dash mount to be cut off and rear screw hole modified.

600157 Fits carbureted Twin Cam 88 Softtail models from 00-06

600154 Fits Sportster models from 82-03

Weld-In EFI Plate for Custom Tanks

Covert any custom tank to EFI by welding this plate into the base of the tank. Then bolt in an (OEM 75268-07) Sportster type fuel pump (not included) and you are ready to go. Plate dimensions are approximately 8.5" x 5.25" total width and length. Minimum width and length of space required for the pump 6.25" x 2.75"

653105 Weld in plate for fuel pump (tank modification required)

SANTEE

Santee 'Holeshot' Pipes for Sportsters

Custom 1" Handlebars by Biltwell Inc.

Biltwell handlebars are precision crafted with 100% seamless 4130 chromoly. The wall thickness of our tubing is a burly .120". Most bars are available smooth for custom applications, or with dimples to accommodate original equipment throttle, brake and clutch assemblies. (Clubmans are not dimpled so you can flip them either way, chopper or cafe style).

Keystone

Looking for still more style and originality for your custom bike? Consider the Keystone bar. Similar to the Z Bar in every detail, but the uprights are angled inward for a more aggressive look. 28" wide, 6.5" center width, 2" rise, 2" pull back

633202 Keystone bars, non-dimpled, black

633203 Keystone bars, non-dimpled, chrome

633204 Keystone bars dimpled, black

633205 Keystone bars, dimpled, chrome

Solo seats by Biltwell

The shape and curvature of our solo seat was created and hammered by Chris Collins. Functional, comfortable styling cues include a narrow profile, a short, supportive nose, gently sloping sides and a subtle rear kick to keep you from sliding off your ride. The pan is stamped from heavy gauge high-tensile steel and features ribs and indents for added rigidity and stiffness. The four threaded mounting bosses are TIG welded into position and the entire seat pan is powdercoated for beauty and weatherproofing. The foam inside our upholstered solo seats is custom-molded, medium-density polyurethane padding—not a shapeless wedge of open-cell foam. What's the difference? Ask your junk that question after a 150-mile ride. Our molded foam will hold its shape long after the cheap padding inside most solo seats has compressed into oblivion. 15" x 11,5".

684735 Vinyl solo seat tuck & roll black

684737 Vinyl solo seat diamond black

619621 Black 04-13

Sight Gauge Kit

For those of you into vintage rides, you'll remember the Sight Gauges installed on the outside of old oil & gas tanks. There was this clear tube that ran up & down, and you could see the fluid level...those old rides sure leaked oil, so you had to know when to add more! Well, we think that was a way cool accessory, and our buddy Kirk at Custom Design Studio has put together a kit with all the parts you need to install one on your retro build as well. The kit includes 2 weld-in 1/8" NPT bungs, 2 ninety degree X 1/4" X 1/8" NPT fittings and an 8" length of transparent, fuel resistant urethane tubing. (Cut to length and use hose clamps of your choice to secure). For use in custom show bike applications only, with welding of bungs into Gas/Oil tank required. Made in USA by Custom Design Studio.
