### **S&S HI-4N Ignition**

- One piece machined aluminum housing reduces vibration and improves heat dissipation and reliability
- Improved kick start algorithm designed to start as easily as points
- BCD switches with solid detent and legible marking allow easy and repeatable adjustments of mode, advance rate, and rev limit
- Single-fire and dual-fire function built into a single module
- Flexible wiring harness makes installation easier
- Initial timing marks allow precise adjustment and reinstallation
- Sensor covers integrated into housing to provide protection during installation

**24512** 84-99 Big Twin & 71-02 Sportster, Ignition only

**24548** 70-98 and some 99 Big Twin w/ Evolution engine, (non-fuel inj.) and 71-02 Sportster. Includes Cams HI-4N Ignition, S&S Single-Fire Coil and S&S 8.5 mm double silicone, premium quality spark plug wires.

### ***Billet Aluminum Motor Mounts by MW***

These stylish German-made motor mounts are CNC-machined and then given a highly-polished finish and furnished with stainless steel mounting hardware. They're the ideal companions to the MW coil bracket systems which can be seen above, and are available in Standard and Super Light versions which feature stylish weight saving cut-outs. If desired, Original Equipment-style ignition switches can be installed in place of the coil brackets on these motor mounts thru the additional purchase of a CC #**86289** Switch Mounting Bracket.

#### ***Fit Sportster Models from 86-03***

- 86272** Standard
- 86276** Super Light
- 86288** Spacer to provide necessary clearance between the engine and the coil or accessory ignition switch brackets when installed

CATALOG "EDITION 46" PAGE 6.17

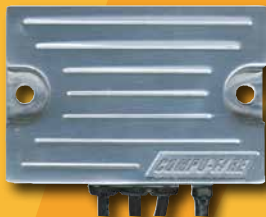

### ***Pulstar Pulse Spark Plugs***

Pulstar spark plugs generate up to 12% more horsepower and torque. They improve fuel efficiency, throttle response. The Pulstar plugs come with iridium electrodes and a capacitor built in for increased spark energy.

Note: For engines with performance modifications it is recommended to richen the air fuel mixture and slightly retard the timing.

- 688110** Pulstar plug 2PK for Twin Cams
- 688111** Pulstar plug 2PK for Evolution and Shovelheads

CATALOG "EDITION 46" PAGE 6.26

## **Compu-Fire High Performance Series Voltage Regulators**

- New generation series regulator obsoletes outmoded shunt regulators
- Black powder coated, bolt-on replacements
- Voltage output is suitable for maintenance-free batteries
- Reduces load on stator and extends stator life
- Reduces engine drag for extra power
- Delivers high performance at an exceptional cost!

**17030** 32 amp for Evolution Big Twin models from 89-99

**17031** 22 amp for Big Twin models from 81-88

**17035** 22 amp for Sportster models from 91-99 and Buell models (except Blast and Firebolt models) from 93-96

## **Compu-Fire Chrome Billet Series Voltage Regulators**

Offering the same sophisticated technical features as their line of OEM-style regulators, but in an attractive "bullet-proof" chrome billet case with mounting bracket.

**23235** 32 amp for Evolution Big Twin models from 89-99

CATALOG "EDITION 46" PAGE 6.33

## **Solenoid Cover Starter Button Switches**

Can be used as a "back up" system or as a custom starter button without the need for a starter switch on your handlebars. It bypasses the stock relay, permitting starter activation at the push of a hidden button. Fits stock bikes and customs using late style 1.2kw, and 1.4kw output type starters.

**640909** Chrome

**640910** Black wrinkle finish

CATALOG "EDITION 46" PAGE 6.45

## **m-Unit V.2**

The m-Unit V.2 is a digital control unit for your motorbike - the 'heart' of the vehicle's electrical system.

- Control over handle bar push-buttons or conventional switch control units
- Completely replaces the fuse panel! Up to 8 independent circuits are digitally monitored and de-energized in case of failures. After removal of the fault, the safety feature is automatically reset
- Diagnostics for all circuits use 15 status LEDs
- highest possible operational dependability with micro processor controlled and monitored switching operations
- flexible feature configuration due to simple device setup
- No mechanical relays - newest generation semiconductors switch quickly, free of loss and wear.
- utterly compact dimensions
- The m-Unit V.2 provides for hassle-free wiring and requires minimal wiring harnessing.
- Control of high and low beam possible with only one push-button.
- Digital hazard light control - stays on even after de-energizing the main system.
- integrated digital, load independent flasher relay (like m-Flash), timer-controlled automatic deactivation.
- selectable flasher mode with fade-in/fade-out effect like with the m-Wave! timer-controlled automatic deactivation.
- Navigation light feature selectable over all turn signals! Permanent low-light at each turn signal.
- integrated digital brake light modulator (like m-Stop), selectable flasher mode.
- integrated alarm system (gravity field sensor)
- intelligent deactivation of certain devices at engine startup
- only one cable required to control combined rear and brake lights
- completely water tight and vibration resistant

### **Dimensions and specifications:**

L/W/H: 101 x 61 x 28 mm

Fixture: 2 x M5 screws, stainless steel (mounting and ground terminal), 1 x M5

### **Parts delivered:**

m-Unit V.2, approx. 50 cm connector cable for battery plus terminal with 10 mm<sup>2</sup> nominal cross-section, 2 cable eyelets, 1 x M5 stainless steel screw, 2 x M5 stainless steel screw with nut, detailed installation and operating instructions

**682752** m-Unit V.2

**690974** m-Button

## **m-Lock**

The m-Lock is a contact free digital ignition lock with RFID technology and substitutes mechanical ignition locks or their electrical switching feature respectively.

- RFID technology is tamper-resistant
- each key has a unique code
- the key first activates the m-Lock without touching it and then, via the relay, the entire on-board system
- neither key nor m-Lock suffer from mechanical wear
- the key requires no battery - failsafe
- no overload or scorched pins possible due to indirect switching via the 40 A main relay
- the m-Lock is very compact and can be mounted hidden in many places
- water tight and vibration resistant because of the moulded-in construction
- depending on the model, key sizes range from very small (key fob sized) to tiny (glass vial) and may be integrated into other objects like gloves, clothing, pendants (NON-METALLIC!) etc.
- keys can be easily purchased and 'learned' to any m-Lock - your integrated locksmith
- a switching distance of 4 - 5 cm ensures convenient switching while excluding the possibility of accidental engagement
- An integrated LED shows the status of the m-Lock while mounting, connecting and 'teaching' new keys

### **Dimensions and specifications**

Transmitter/receiver, diameter of installed assembly: 30 mm, Height: 14 mm, Cable length: approx. 50 cm, Weight incl. cable: approx. 30 g, Fixture: 2 x M3 threaded hole on back side, Operating voltage: 6V - 18V, Operating temperature: -20 °C... +80 °C

### **Parts delivered**

## **Mini Mufflers by Biltwell**

Biltwell mini mufflers slip fit over the open ends on 1-3/4-inch O.D. custom pipes to change the look and sound of the exhaust system on your motorcycle. A perforated steel baffle tube with fiberglass wrapping inside the mini muffler can be removed to change the exhaust note.

Exhaust systems shown may be intended only for restoration purposes or to be used on closed areas such as race tracks. The use of this items on public roads may be against local, state and/or federal/EU laws.

Note: No warranty on exhaust chrome plating blueing or discoloration. All EFI models must be remapped! Please ask your local dealer.

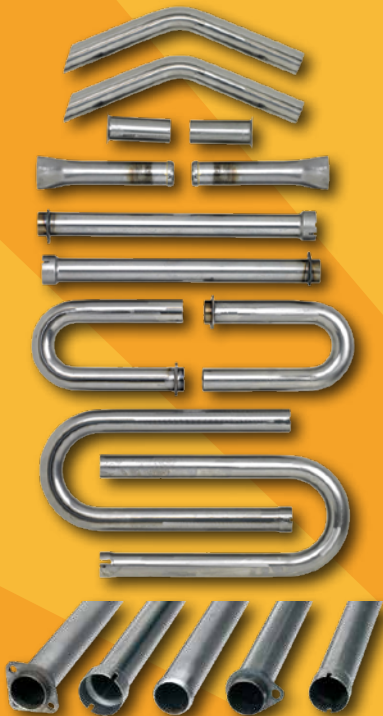

## **Universal Exhaust Builders Kit**

A selection of pre-fabbed 1 3/4" tubing, header flanges and exhaust tips that puts the art of custom exhaust building in your hands! Each Kit includes: Two 16-inch-long (350mm) straight sections, Two 3.5-inch radius (90mm) U-bends with Panhead flanges (flanges not shown in picture), Two 5-inch radius (134mm) U-bends with STD 3-hole flanges (flanges not shown in picture), Two Evolution cylinder flanges, Two Shovelhead cylinder flanges, Two Ironhead cylinder flanges and Two pinched tips. Everything needed to build a set of pipes for one bike, with enough scraps left over to start on another! Simply cut/weld as required, using the flanges that fit your engine. Finish them off with the exhaust wrap also featured in the Exhaust section for a bad-ass look! Kit does not include mounting brackets, clamps, snap rings and exhaust flange collars for Evo's, which are offered separately. Raw steel. From our buddies Magoo & Chris at Biltwell, Inc.

**632735** Universal Exhaust Builders Kit

CATALOG "EDITION 46" PAGE 7.79

## **New Exhaust Flanges by Crime Scene Choppers!**

Instead of a flat flange and a lump of weld how about a smooth, flared transition from the engine to the pipe? These are machined out of a solid block of steel, and have a really nice finish. If you're into building your own stuff they can help you fab a spectacular set of pipes especially when coupled with CSC exhaust tube step adapters.

**682789** CSC exhaust flange

CATALOG "EDITION 46" PAGE 7.79

## **Billet 'Hyper Force' Multi-Plate Kit by Piston**

No more leaking air cleaners with the innovative adaptor plate with an internal engine breather and without any hoses. But that's not all, the 'Multi Plate' fits Keihin CV, Mikuni and S&S carburetors on Evolution models from 84-99, carbureted Twin Cam 88 models from 99-06, EFI Twin Cam models from 01-15 (except TBW), and all RevTech engines (with adaptor). Also available for Evolution Sportster models. Different mounting holes allow the mounting of twisted intake manifolds from CV, S&S, 'Hyper Force', KüryAkyn 'Hypercharger' and 'Forcewinder' air cleaners. Includes all necessary hardware and gaskets. Available with polished, black or chrome finishes. Requires a spacer if equipped with a standard air cleaner in wide tank applications. EFI models must use CC #686645 brackets. For multi plate mounted instruments see also page 17.26. Hyper Force Multiplate Classic and Radical fits also carbureted models and all EFI models 01-16 Delphi to present. except TBW models.

## **Vulcan Engineering Transmission Sprocket Chain Conversion Nut.**

This nut is used when converting a transmission pulley to a chain sprocket. It will take up the extra spline length. Made in the USA from 4140 tool steel. Fits 5-speed & 6 speed Big Twin models 90-Up and 5-speed Sportster models 91-Up. Sold each.

**612395** Transmission sprocket chain conversion nut

## Motor Factory O-Ring Chains

Motor Factory XLO chains by Diamond Chain Company. The XLO series chain is a full 40% stronger than standard chain and features permanent O-ring lubrication that seals in lubricant yet keeps out contaminants. These top of the line chains provide extra load-carrying capability and have a service life that averages four times that of a standard chain. Requires less maintenance than standard chains and due to less stretching, fewer adjustments are required.

## Narrow and Wide Springer Forks by DNA

Reinforced top and bottom trees reduce flex and improve handling. They feature TIG welded alloy steel construction for strength and durability. Kit includes main springs, fork legs, neck, top nut, crown nut, rocker assemblies with brass bushings and top clamp. Fully chromed, or black with chrome rockers, top clamp and springs. They fit all cast neck Big Twin models from 49-Up with 1" neck bearings (except FXR, Dyna Glide and Touring models), and require the use of risers with 1/2"-20 mounting bolts. 3/4"-diameter axles.

Note: Use the sizing chart below to determine which length would be the best part number for your particular application.

## **Custom 'Bobber Style Gas Tanks' by Cole Foster**

An absolutely beautiful new tank designed with the keen styling of Cole Foster - Salinas Boyz Customs. The tanks feature a mini pop-up gas cap, and a unique raised tapered bead down the center of the tank. Each tank has been designed to fit to stock frames but can also be easily adapted to any custom application. They use the existing stock rubber mounts or are included as needed. Fuel capacity is 2.35 gallons.

**600158** Lucky F\*cker Cole Foster Bobber Tank for EFI models

**600155** Fits Evolution Softtail models from 84-99 and 4-speed FX and FL models and custom applications.

Note: These applications require the front frame dash mount to be cut off and rear screw hole modified.

**600157** Fits carburated Twin Cam 88 Softtail models from 00-06

**600154** Fits Sportster models from 82-03
